

# Host a COVID-19 Vaccination Site!

9Health:365 has activated resources to support the State's effort to distribute vaccines to traditionally underserved populations. We're working to reach as many Coloradans as possible, so we're looking for opportunities to serve local communities.

## 9Health:365 supports with:

- Securing the vaccine & vaccinators (in partnership with Safeway / Albertsons Pharmacists)
- Recruitment of volunteers (You can send people to <https://www.9healthvolunteer.org/>)
- Site Lead (9Health staff member(s)) to setup, train volunteers and close-out the clinic
- Provides supplies: disinfectant, hand sanitizer, snacks for volunteers and more

## Host site is asked to:

- Provide building space (preferably with one-way flow)
- Tables & chairs
- Access to bathrooms
- Access to power
- Access to Wifi
- Support spreading the word to community members

Our goal is to support equitable distribution. So far, in Colorado, Caucasian residents have received 68% of total vaccinations. While communities of color have each received less than 12% of distributed vaccines, respectively.

**We hope you join our shared-mission to reach the communities experiencing the highest disparities in accessing the COVID-19 vaccine. By working together we can help stop the spread!**
